## PERSONAL STATEMENT

I'm a 30 years old Full Stack Developer from Évora (Portugal) and I love everything that has to do with web and mobile development.

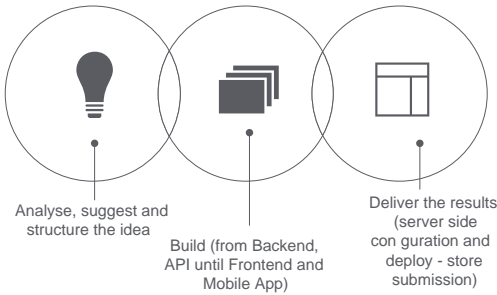

After 7 years working at DigitalWorks, building websites (Frontend and Backend) and Mobile Apps, directly from Évora to Portugal and UK high profile companies, I moved to a new job at NomadExperts, where I'm a fullstack developer working remotely to PVH (Tommy Hilgger and Calvin Klein) branch on Amsterdam.

Since April 2019, I also founded my own company, PipeCodes, where I expect to build a team and create some nice products based on some ideas I have or also to provide services to other client needs.

Over the past years I've come from HTML, Javascript, React, Angular, into PHP, Node, Laravel, ASP.NET MVC C#, JAVA, Python, Django, Drupal, Wordpress etc. Then mobile comes up and I started to build apps using Android Native Development (JAVA), iOS (Objective C & Swift), Xamarin, ionic or React Native...

I've also been in charge of managing (from the client and technical point of view) some of that projects from scratch, building all from the idea, consulting until the final deployment or store

## MY SPECIALITIES

## PORTFOLIO
